

VIRTUAL TOUCH-FREE COMPUTER CAMP

OUR VIRTUAL VERSION OF THE TRADITIONAL WEEKEND COMPUTER CAMP FOR "HIGH-PROMISE" INDEPENDENT LIVING PROGRAM (ILP) AND MIGRANT EDUCATION PROGRAM (MEP) YOUTH!

In the interest of safety, the computer camp training is delivered via an asynchronous (independent learning) or a synchronous (with teacher virtually) learning model. The options avoid the need for students to gather in one place. Laptops, printers, computer accessories, and other learning materials are shipped to students or delivered using our drive-thru pick-up model.

20 Participant Minimum Required

As with the traditional "classroom" format, the program introduces youth participants to the skills necessary to effectively use a computer at home, school, and for accessing online learning and community resources.

Our Virtual Touch-Free Training Program includes:

Brand New Laptop Computer and Printer Included (*Loaner Program Option Available)

Teacher-Hosted Virtual Room Office Hours (Synchronous and Asynchronous)

Embedded Desktop Videos (No Internet Required)

Online Independent Living Program Skills Workshop - One Year Subscription (Optional Program With 90 Lessons, Internet Required)

Introduction to Google Suite® and Microsoft® Office® Student Suite

The online independent living lesson plans are interactive and organized into five thematic catalogs that align with the mandates of the John H. Chafee Act and the Ansel-Casey assessment tool. At the successful conclusion of the 25 minutes to one-hour lessons, participants receive a certificate of completion (70% mastery required).

- * Loaner Program Option: (managed by agency)
- Agency owns the electronic devices that accompany the training
 - The equipment is assigned to students throughout participants' eligibility - similar to the process schools employ for assigning text books
 - Instructional Access, Inc. provides 24 month warranty coverage for each unit
